BRITTANY PIZARRO
WEB DEVELOPER

I'm a web developer who loves turning ideas into simple solutions. Whether I'm learning a new JavaScript framework or picking up dance steps after work, I'm always chasing the next challenge. My curiosity keeps me growing, my teamwork keeps things fun, and my "let's figure it out" attitude means I never shy away from something new. Right now, I'm diving deep into React and modern JavaScript because I'm excited about what's next—for the web and for myself. Building great digital experiences starts with a genuine love for learning and a solid team.

EXPERIENCE

WEB DEVELOPER
Midwest Hose *08-2024 - Present*

- Led the consolidation and redesign of multiple company websites into unified, user-friendly platforms, managing all aspects of development and implementation as the organization's web developer.
- Integrated scalable e-commerce solutions and optimized platforms for future growth, ensuring responsive layouts, smooth user interactions, and ongoing site enhancements.
- Collaborate cross-functionally with designers and managers to deliver high-quality web solutions, provide guidance on best practices, and drive continuous improvement through feedback and testing.

WEBSITE CHAIR & WEB DEVELOPER - VOLUNTEER
Techlahoma *04-2024 - Present*

- Work closely with cross-functional teams, including executive leadership and board members, to identify, discuss, and prioritize website needs, improvements, and future projects.
- Maintain clear communication and provide regular updates on website changes, demonstrating initiative and strong interpersonal skills throughout the project lifecycle.
- Collaborated as part of a dedicated team to successfully redesign the organization's website, ensuring it met stakeholder needs and modern usability standards.

WEB DESIGNER/DEVELOPER
Flight Agency *09-2022 - 04-2024*

- Built and maintained a diverse portfolio of 80+ websites using Webflow, Shopify, Squarespace, and complex WordPress multi-site installations, crafting responsive, accessible (WCAG-compliant) sites with intuitive UI/UX using HTML, CSS, PHP, and JavaScript.
- Fostered a collaborative environment between development, design, and project management teams, proactively addressing roadblocks to ensure on-time project delivery, reduce rework costs, and achieve positive client feedback.
- Led process improvements by conducting extensive research and testing, resulting in a documented and implemented QA process that streamlined web development workflows.
